Verbal Description

Censer plug from complex censer. Tip of plug has a large fire cloud. Cloud extends down the side of the plug. The censer plate does not show evidence of big bent. There is a vent hole at the base of the plug, but it does not go through - the clay is not pierced. Looks like they tried to pierce too close to the plate - clay layer too thick. Some smoochy marks near the base of the plug from when it was attached to the plate. No paint slip or other decoration.
